Investment Objective

The NorthStar Ethical Growth Portfolio is suitable for investors who are seeking to invest 'ethically' and require a balance between capital growth and capital security. The portfolio is constructed using a broad range of assets which may include equities, fixed income, property, infrastructure, alternative investments and cash. The diversification of this portfolio will insulate investors from some short-term market volatility. Investments are predominantly held in assets that seek to promote ethical, sustainable and socially responsible causes and exclude companies that promote or produce tobacco, fossil fuels, arms, gambling, animal testing and similar activities. Equity content will typically be around 70%, meaning the portfolio will exhibit moderate downside risk to achieve the required level of capital growth.

Due to the nature of underlying holdings, investment in this portfolio should be seen as a long-term strategy. Risk aspects include inflation risk, capital risk, shortfall risk, and exchange rate risk. The key objective of the portfolio is to adhere to high ethical, sustainable and socially responsible standards at all times. These considerations will always take precedence over portfolio returns. The portfolio targets capital growth in excess of 5-6% per annum over a rolling 5-year period and is benchmarked against the IA Mixed Investment 40-85% Shares sector average. Values may fall as well as rise and investors may not get back the amount originally invested.

Portfolio Performance

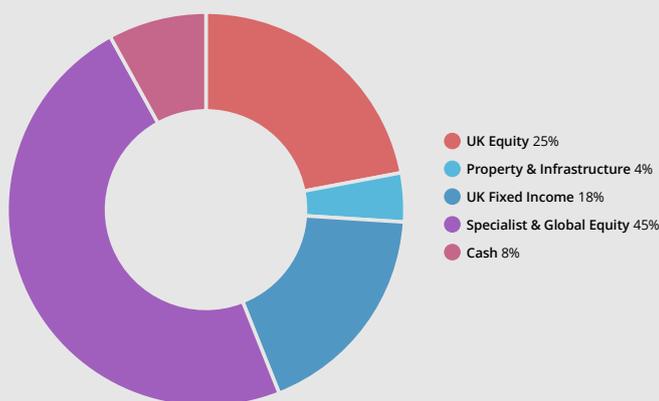

Performance of the NorthStar Ethical Growth Portfolio to February 2021:

	3 Months	6 Months	1 Year	3 Years	5 Years	Since Inception
NorthStar Ethical Growth Portfolio	9.2%	10.0%	7.6%	22.4%	54.8%	59.3%

Portfolio Commentary

Investment returns were positive over the past six months with investors enjoying strong gains. Stock markets significantly rebounded following positive news on the roll-out of vaccines, a conclusive result in the US election and signs that the global economic recovery is now well underway.

The COVID-19 pandemic has accelerated several megatrends including home working, e-commerce, video communication and other digital services. This has created huge opportunities and investor value in companies in these sectors but the pandemic has also had a detrimental for firms in more traditional industries such as 'bricks and mortar' retail, leisure, hospitality and travel. It has also been evident that some countries have handled the pandemic better than others with this clearly reflected in stock market returns and economic performance differentials.

The NorthStar Ethical Growth Portfolio recorded a return of 10% during the six months since the last investment review. This performance saw it finish in line with the benchmark over this period. Over the past year as a whole, the portfolio is up by 7.6%. The best performing fund was Vanguard ESG Developed World All Cap Equity Index, with a return of nearly 15% over the past six months. At the other end of the spectrum was Royal London Short Term Money Market, recording a zero return.

As we look to the year ahead, it is difficult to accurately forecast investment returns with the full economic, health and social impacts of the pandemic and the shape and length of the subsequent economic recovery remaining largely unknown. The global economy is expected to continue to rebound with governments and central banks remaining supportive. We expect the heightened levels of volatility in many markets to persist and the road ahead to have a few bumps along the way. Despite this, the demand for 'real assets' is likely to remain strong. We see more positive than negative drivers for markets in 2021 and are optimistic for further returns for investors.

NORTHSTAR
Smarter Financial Planning for the Digital Age

1. Targeted average annual return is based on the average long-term returns of applicable asset classes and is in no way guaranteed. 2. Over a rolling 5-year period. 3. Portfolio charges are calculated using the average fund charges across all applicable platforms. Performance data are on a bid-to-bid basis, with income reinvested. Performance data do not take into account platform or advisory charges and exclude any holdings in platform 'cash accounts'. Performance data show returns for discounted 'super clean' funds where these are available. Such funds may not be available on all platforms. Performance data are rounded to the nearest 0.1% so small rounding errors may occur. Data correct as at 01.02.21. Source: FE. The value of investments and the income from them can fluctuate and investors may not get back the full amount invested. Past performance is not necessarily a guide to future performance. The tax treatment of investments depends on individual circumstances and is subject to changes in tax legislation. Figures are provided for illustrative purposes only and their accuracy cannot be guaranteed. Information provided should not be relied upon in isolation when making investment decisions and does not constitute advice or an offer to purchase any investment or product.
