Investment Objective

The NorthStar Adventurous Growth Portfolio is suitable for investors who are seeking very strong long-term capital growth and are prepared to accept significant short-term fluctuation in order to achieve this aim. The portfolio is constructed using a broad range of assets which may include equities, fixed income, property, infrastructure, alternative investments and cash. Equity content will typically be around 100%, meaning the portfolio will exhibit significant downside risk to achieve the required level of capital growth.

Due to the nature of underlying holdings, investment in this portfolio should be seen as a long-term strategy. Risk aspects include inflation risk, capital risk, shortfall risk, and exchange rate risk. The portfolio targets capital growth in excess of 7-8% per annum over a rolling 5-year period and is benchmarked against the IA Flexible Investment sector average. Values may fall as well as rise and investors may not get back the amount originally invested.

Portfolio Performance

Performance of the NorthStar Adventurous Growth Portfolio to August 2021:

Portfolio Charges

At NorthStar, we're committed to providing clear and simple charges for our investment portfolios. We believe in total transparency so you'll always know what you will pay.

Portfolio Commentary

Global investment markets continued to push higher in recent months as many countries began to lift COVID restrictions. Vaccination rollouts have allowed most governments in Europe and North America to start to re-open their economies with consumer demand rebounding strongly. The picture is more mixed in many Asian regions and there are some significant challenges for the majority of developing nations to establish an effective COVID suppression strategy.

The re-opening of the global economy has also seen a surge in commodity prices, with the cost of fuels and other raw materials rising in many regions leading to a spike in inflation. Many central banks have indicated they are likely to accept higher inflation over the coming years but there remain concerns that interest rates may have to rise to keep price rises under control if this level of inflation persists. This factor, along with concerns over new COVID variants took the edge off returns over the summer months, but the general direction of most markets remains upward.

The NorthStar Adventurous Growth Portfolio recorded a return of 8.6% during the six months since the last investment review. This performance saw it finish ahead of the benchmark which ended the period 7.9% higher. Over the past year as a whole, the portfolio is up by 27.2%, well ahead of the benchmark. The best performing fund was Marlborough UK Micro Cap Growth, with a return of over 23% during the past six months. At the other end of the spectrum was JPM Asia Growth, recording a fall of nearly 10% over this period.

Investment returns are likely to be driven largely by the recovery from the pandemic during the remainder of 2021. Significant challenges remain in terms of vaccine delivery in developing countries, the co-ordination of government strategies, barriers to travel, economic recovery policies and the risks of new variants. How these factors are handled is likely to determine the outlook for investors over the next few years.

NORTHSTAR
Smarter Financial Planning for the Digital Age

1. Targeted average annual return is based on the average long-term returns of applicable asset classes and is in no way guaranteed. 2. Over a rolling 5-year period. 3. Portfolio charges are calculated using the average fund charges across all applicable platforms. Performance data are on a bid-to-bid basis, with income reinvested. Performance data do not take into account platform or advisory charges and exclude any holdings in platform 'cash accounts'. Performance data show returns for discounted 'super clean' funds where these are available. Such funds may not be available on all platforms. Performance data are rounded to the nearest 0.1% so small rounding errors may occur. Data correct as at 01.08.21. Source: FE. The value of investments and the income from them can fluctuate and investors may not get back the full amount invested. Past performance is not necessarily a guide to future performance. The tax treatment of investments depends on individual circumstances and is subject to changes in tax legislation.
